

Environmental Policy Statement

Pipework Systems & Installation Limited is an environmentally conscious organisation and as such we acknowledge the potential environmental impact that our design, manufacturing & site installation operations may have on the environment.

This policy has been endorsed by the Board of Directors and Senior Management, who give their full support to its implementation. The Board of Directors and Senior management, in co-ordination with the Company Environmental Officer are responsible for ensuring that it is communicated, understood, implemented and maintained at all levels within the organisation.

We are committed to the prevention of pollution and continual improvement of our environmental performance. This has been facilitated through the setting of environmental objectives based on our significant environment aspects. These objectives will be documented, allocated targets and periodically monitored and reviewed through 'audit programmes'. The results of which are communicated throughout the organisation, to our Customers, suppliers and contractors, where applicable.

As an organisation, we are committed to ensuring that we: -

- Compliant with all environmental legislation, codes of practice and guidance produced by regulatory bodies and our Customers' Environmental Management Systems, where these are applicable and relate to the environmental aspects of our own business.
- Provide all employees with the necessary resources, equipment, information, instruction and training to fulfill the requirements of this policy, commensurate with their role.
- Work towards an environmental management system accreditation, in accordance with the requirements of BS EN ISO 14001: 2004, as defined within the scope of our EMS.
- Strive to integrate environmental best practice into our business operations.
- Prevent pollution to the environment, by ensuring that we manage waste.
- Minimise waste to landfill by reducing our waste generation and by segregating and recycling waste where economically and operationally feasible.
- Co-ordinate business mileage so as to maximise fuel efficiency.
- Use energy, water, materials and other natural resources as efficiently as possible, giving particular regard to the long term sustainability of consumable items.
- Identify, quantify and reduce our carbon footprint and off-set our emissions through carbon negative projects.
- Ensure that the environment is considered in the procurement of goods and services.
- Give appropriate consideration for the environment in the goods and services we provide to Customers

This policy will be communicated to all employees and organisations working for or on behalf of PSI Limited. Employees and other organisations are expected to co-operate and assist in the implementation of this policy, whilst ensuring that their own work, so far as is reasonably practicable, is carried out without risk to themselves, others, or the environment.

This policy will be reviewed annually by the Directors & Senior Management Team and where deemed necessary will be amended and re-issued. Previous versions of this policy will be archived and are available upon request.

This policy statement is displayed at PSI facilities and worksites where PSI Limited is the prime contractor. It is publicly available as may be reasonably requested by any interested party.
